PROFESSIONAL SUMMARY

Software Engineer specializing in full-stack application development with hands-on experience building and deploying production-style web applications. Proficient in React, Python, Django, Flask, PostgreSQL, and modern cloud platforms. Experienced in designing APIs, managing database systems, implementing authentication and authorization workflows, and delivering end-to-end software solutions. Adept at collaborating on technical projects, troubleshooting complex issues, and applying software engineering best practices.

RELEVANT EXPERIENCE

Independent Software Engineer

Mar 2024 – Present

Self Employed

Remote

- Design, develop, and deploy full-stack web applications using React, Python, Django, Flask, and PostgreSQL.
- Build production-style applications including authentication systems, REST APIs, database-driven platforms, and cloud-deployed solutions.
- Develop and maintain personal software projects to explore modern development practices, application architecture, and scalable system design.

Software Engineer

Jan 2022 – Mar 2024

TechAlias Solution Pvt. Ltd.

Nepal

- Developed and maintained full-stack web applications using Python, Django, Django REST Framework, and PostgreSQL, building scalable backend systems and user-focused web solutions.
- Designed and developed RESTful APIs to support application features and enable efficient communication between frontend interfaces and backend services.
- Built database models, managed data workflows, and optimized queries to improve application performance and reliability.

EDUCATION

Master of Science, Computational Science

May 2024 – April 2026

Laurentian University

Sudbury, ON, Canada

- Relevant Coursework: Intro to Computational Science, Cloud Computing, Research Methods, Machine Learning.

PROJECTS | MORE ON GITHUB

Employee Onboarding Portal | React, Django REST Framework, PostgreSQL, JWT, Tailwind CSS

2026

- Developed a role-based employee onboarding platform allowing HR administrators to assign documents and employees to upload completed onboarding files.
- Implemented JWT authentication, role-based permissions, REST APIs, and PostgreSQL database management.
- Created separate workflows for HR and employees to manage document submission and approval processes.
- Deployed the application using cloud platforms with production database configuration.
- **Live Demo:** [Employee_Onboarding_System](#)

URL Shortener with Authentication | React.js, Flask, MySQL

2026

- Built a full-stack web app where users can register, log in, shorten URLs, and manage them through a personal dashboard.
- Implemented session-based authentication and created REST API endpoints for URL creation, redirection, and user management.
- Used PostgreSQL for persistent data storage and Flask for backend routing and business logic.
- **Live Demo:** [URLShortener_with_Authentication_System](#)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, C++

Frontend Technologies: React.js, React Router, HTML5, CSS3, Tailwind CSS, Axios

Backend Technologies: Django, Django REST Framework, Flask, RESTful APIs

Databases: PostgreSQL, MySQL, Supabase

Authentication & Security: JWT Authentication, BCrypt, Role-Based Access Control

Automation & Web Scraping: Selenium, BeautifulSoup, Web Scraping, Browser Automation

Developer Tools: Git, GitHub, VS Code, Linux, Jupyter Notebook

Cloud & Deployment: Vercel, Render, Environment Variables, Cloud Database Deployment, Production Deployment

Core Concepts: Object-Oriented Programming, Data Structures & Algorithms, SDLC, Database Design, REST API Design, Debugging
